

# Do the Work Solution: Add Mouse Over Handling to Display the Year of a Stripe

To display the year of a stripe with a mouse over handler, add one line of code to the end of the method chain that creates the rectangles for the stripes:

```
1. let stripes = svg.selectAll("rect")
2.     .data(data).enter()
3.     .append("rect")
4.     .attr("width", stripeWidth)
5.     .attr("height", stripeHeight)
6.     .attr("x", (d, i) => i * stripeWidth)
7.     .attr("y", 0)
8.     .style("fill", (d, i) =>
    colors[Math.round(linearScaleForData(d.avg))])
9.     .on("mouseover", (d) => console.log(d.year));
```
